- Thanks a lot team. Provided solution is worked for me.

Comment by: Rahul Kumar on Nov 6, 2020 11:03:53 AM
- Hi Rahul,

I'm working on this case.

There are 5 apps (research note) running in the VPC. Please delete them and try again

"

VPC name - zenni-vpc
Error - VPC could not be deleted: resource sg-01b3fa8c68ba007e9 has a dependent object

"

There was a VPC peering. I have deleted it. Please try once again.

"

VPC name- non-prod-vpc
Error - VPC could not be deleted: The vpc 'vpc-067d9425b19c78093' has dependencies and cannot be deleted.

"

Case Details

Contact Name	Rahul Kumar (/s/detail/0032T00002KNOrPQAX)
Case Owner	Steven Yu
Product	Anypoint Platform
Component	Runtime Manager
Version	
Subcomponent	VPCs

Description Information

Subject	unable to delete VPC from Runtime Manager
Description ⓘ	<p>Hello Team,</p> <p>I am not able to delete existing VPCs from Runtime Manager and getting below error :</p> <p>VPC name - zenni-vpc Error - VPC could not be deleted: resource sg-01b3fa8c68ba007e9 has a dependent object</p> <p>VPC name- non-prod-vpc Error - VPC could not be deleted: The vpc 'vpc-067d9425b19c78093' has dependencies and cannot be deleted.</p>

Please do the needful so that I can delete existing VPCs and recreate new one with different config.

Thanks and Regards,
Rahul Kumar

Hello Rahul,

Thank you for logging this case with MuleSoft Support. I'll dispatch this case to our platform support team who can assist you further.

As FYI - typically this issue may occur if you still have resources existing linked to the VPC, like CloudHub application, DLB, IPSEC gateway etc.

Cheers,
-Daniel
